

Satya Shreyas Rachakonda

Bengaluru, India | satyashreyas.r@gmail.com | +91-7569741289 | [LinkedIn/rsatyashreyas](https://www.linkedin.com/in/rsatyashreyas) | [GitHub/satyashreyasr-oss](https://github.com/satyashreyasr-oss) | [rsatyashreyas.com](https://satyashreyas.com)

Summary

AI/ML and full-stack focused B.Tech CS student with hands-on experience across the ML stack - from training ensemble classifiers and CNNs to deploying RAG pipelines with ChromaDB and LLM APIs. Comfortable building full-stack applications with FastAPI and React.js, backed by a prior front-end internship. Open to AI/ML or software engineering internship roles.

Education

Jain (Deemed to be University)

Bachelor of Technology, Computer Science in Artificial Intelligence & Machine Learning

Bengaluru, India

Aug 2024 – Jun 2028

CGPA: **8.5/10.0**

Coursework: Machine Learning, NLP, Computer Vision, DSA, DBMS, OOP

Technical Skills

Languages: Python, C++, Java, JavaScript, HTML, CSS, SQL

AI/ML: TensorFlow, PyTorch, scikit-learn, RAG, LLMs, CNN, Transformers, Sentence-Transformers

Frameworks: React.js, FastAPI, Flask, Pandas, NumPy, NLTK

Tools: Git, Docker, ChromaDB, Streamlit, Groq API, Gunicorn

Databases: MongoDB, MySQL, SQLite, Vector Databases

Visualization: Tableau, Power BI

Work Experience

Front-End Development Intern

August 2025 – September 2025

Cognifyz Technologies

Remote

- Designed and shipped 5+ responsive UI components using React.js, HTML, and CSS; tested across 3 browser environments to confirm consistent rendering across browsers.
- Collaborated with the team on 10+ project tasks covering layout performance, component reusability, and accessibility standards; completed all deliverables on time.
- Participated in code reviews and refactored component logic based on peer feedback, reducing review cycles across the team.

Projects

CohortIQ – Student Academic Performance Prediction [\[Link\]](#)

Apr 2026

- Trained a Gradient Boosting model on 10 academic features (attendance, GPA, quiz scores, study hours) achieving **$R^2 = 0.92$** and MAE = 3.9, with a FastAPI backend tracking live MAE/RMSE/ R^2 metrics per prediction.
- Delivered a React.js analytics dashboard with scatter plots, error histograms, and feature importance charts allowing score comparison per class section.

SympAI – AI-Powered Healthcare Diagnosis Platform [\[Link\]](#)

Mar 2026

- Engineered a full-stack web app diagnosing **112 diseases** from **256 symptoms** using a 4-model ML ensemble (Naive Bayes, Random Forest, Extra Trees, Decision Tree) with ensemble voting achieving **99.79% accuracy**, physician recommendations, and urgency triage across 4 severity levels.
- Trained a CNN (TensorFlow/Keras) for pneumonia detection from chest X-rays at 91% accuracy, with auto-training pipelines triggering on first launch and image classification routed through the Flask backend.
- Integrated Gemini AI (**gemini-1.5-flash**) as a health chatbot with emergency keyword detection routing to Indian emergency services (112/108); deployed on Render with Gunicorn with a Bootstrap 5 frontend.

RTX 4090 AI Assistant – RAG Pipeline Chatbot [\[Link\]](#)

Nov 2025

- Architected a RAG chatbot for NVIDIA RTX 4090 using ChromaDB vector embeddings and Groq LLM API (Llama 3, Llama 4), enabling semantic search across 4 knowledge domains: GPU specs, LLM benchmarks, Stable Diffusion XL, and workstation builds.
- Implemented sentence-transformer embeddings for document chunking with tunable thresholds and Groq API for query inference.
- Deployed the application on Streamlit Cloud with ChromaDB vector storage on Streamlit Cloud.

ScoreSense – Credit Risk Prediction Model

Apr 2025

- Developed a Logistic Regression credit risk classifier using 7 engineered features (credit utilization, default history, tenure, late payments, income, age, loan amount); evaluated with ROC-AUC and confusion matrix.
- Mapped predicted probabilities to a credit score range (300–850), mapped to the 300–850 credit score scale.

Certifications

- ML with Python (ML0101EN) - **IBM** [Certificate](#)

- Python (Basic) - **HackerRank** [Certificate](#)

- Intro to Computing Systems - **BITTS** [Certificate](#)

- Data Warehousing: Schema, ETL - **Coursera** [Certificate](#)

- Problem Solving (Basic) - **HackerRank** [Certificate](#)

- Crash Course on Python - **Google** [Certificate](#)

- Build a ML Web App with Streamlit - **Coursera** [Certificate](#)

- Thinking for Innovation - **UVA**, **Coursera** [Certificate](#)

Languages & Interests

Languages: English, Hindi, Telugu, Kannada, Japanese (Elementary)

Interests: Open Source Contribution, Kaggle Competitions, AI/ML Research, System Design, Cricket, Cooking
