Summary

AI/ML undergraduate at Jain University (CGPA 8.5) with experience across LLM evaluation, agentic AI systems, RAG pipelines, and full-stack ML applications. Proficient in Python, LangGraph, LangChain, FastAPI, TensorFlow, and Groq API. IBM-certified in ML. Seeking an AI/ML or software engineering internship.

Education

Jain (Deemed to be University)

Bengaluru, India

Bachelor of Technology, Computer Science in Artificial Intelligence & Machine Learning

Aug 2024 – Jun 2028

CGPA: **8.5/10.0**

Coursework: Machine Learning, NLP, Computer Vision, DSA, DBMS, OOP

Technical Skills

Languages: Python, C++, Java, JavaScript, HTML, CSS, SQL

AI/ML: TensorFlow, PyTorch, scikit-learn, LangChain, LangGraph, RAG, LLMs, CNN, Transformers

Frameworks: FastAPI, Flask, React.js, Pandas, NumPy, NLTK, Sentence-Transformers

Tools: Git, Docker, ChromaDB, FAISS, Streamlit, Groq API, Gunicorn, ffmpeg, yt-dlp

Databases: MongoDB, MySQL, SQLite, Vector Databases

Visualization: Tableau, Power BI

Work Experience

AI/ML Intern

May 2026 – Present

ShivohiniTech AI

Remote

- Evaluated LLMs (Gemma 4 31B, Qwen3-235B-A22B) for enterprise deployment using a 100-point scorecard across response quality, RAG performance, cost efficiency, and speed; conducted AWS cost analysis comparing GPU instances (L4, A10G, A100).
- Built a combined Arabic NLP dataset of **155,619 records** spanning MSA and 7 dialects with text, category, language, and dialect labels — fully validated with zero null values; provided Arabic audio clips to support an initial voice prototype.

Front-End Development Intern

August 2025 – September 2025

Cognifyz Technologies

Remote

- Shipped 5+ responsive UI components using React.js, HTML, and CSS; tested across 3 browser environments and completed 10+ project tasks covering layout performance, reusability, and accessibility.

Projects

Multi-Agent Scheduling Assistant [\[Live\]](#)

Jul 2026

- Built a LangGraph-based scheduling chatbot with two cooperating agents — a Triage Agent that classifies user intent and a Booking Specialist that handles the full booking flow across multiple turns with SQLite-backed conversation persistence.
- Implemented conflict handling that blocks the agent from retrying a failed slot on its own, forcing it to present alternatives to the user; all date resolution is computed in code rather than relying on the LLM.

SympAI – AI-Powered Healthcare Diagnosis Platform [\[Live\]](#)

Mar 2026

- Engineered a full-stack web app diagnosing **112 diseases** from **256 symptoms** using a 4-model ML ensemble (Naïve Bayes, Random Forest, Extra Trees, Decision Tree) achieving **99.79% accuracy**, with physician recommendations and urgency triage across 4 severity levels.
- Trained a CNN for pneumonia detection from chest X-rays at 91% accuracy and integrated a Gemini AI health chatbot with emergency keyword detection routing users to Indian emergency services (112/108); deployed on Render.

CohortIQ – Student Academic Performance Prediction [\[Live\]](#)

Apr 2026

- Trained a Gradient Boosting model on 10 academic features (attendance, GPA, quiz scores, study hours) achieving **$R^2 = 0.92$** and **MAE = 3.9**, served via a FastAPI backend with live MAE/RMSE/ R^2 tracking per prediction.
- Built a React.js analytics dashboard with scatter plots, error histograms, and feature importance charts enabling instructors to identify at-risk students before final exams.

AutoDub AI – Automated Video Dubbing Pipeline [\[Link\]](#)

Jul 2026

- Built a 5-stage Python pipeline that takes any YouTube URL, downloads the video, transcribes and translates speech to English, synthesizes a dubbed audio track, and remuxes it back — processing a 2hr 16min video in **28 minutes**.
- Used faster-whisper for transcription, edge-tts for speech synthesis with automatic gender-matched voice selection, and ffmpeg for audio remux without re-encoding the video.

Certifications

- ML with Python (ML0101EN) - [IBM Certificate](#)

- Problem Solving (Basic) - [HackerRank Certificate](#)

- Python (Basic) - [HackerRank Certificate](#)

- Crash Course on Python - [Google Certificate](#)

- Intro to Computing Systems - [BITTS Certificate](#)

- Build a ML Web App with Streamlit - [Coursera Certificate](#)

- Data Warehousing: Schema, ETL - [Coursera Certificate](#)

- Thinking for Innovation - [UVA, Coursera Certificate](#)

Languages & Interests

Languages: English, Hindi, Telugu, Kannada, Japanese (Elementary)

Interests: Open Source Contribution, Kaggle Competitions, AI/ML Research, System Design, Cricket, Cooking
